Which Space Scoop is this comic about?

Para astronom kan belum bisa pergi ke ULX yang lokasinya 12 juta tahun cahaya jauh! Karena itu para astronom mencoba memeragakan denyutan ULX

di Superkomputer yang ada di bumi. Ternyata, hasil simulasi menunjukkan bahwa benda yang diamati itu adalah bintang terang yang berdenyut, yang kita kenal sebagai Pulsar.

OOH, JADI YANG BERDENYUT ITU BINTANG, YA?

Iya, bintang berdenyut inilah yang memotong kemacetan kosmik...

Sudah saatnya Si monster Pulsar jadi sorotan dan pusat perhatian kita!

keren, Aq! (HEBAT!)
